

# Congratulations to Those Who Set the Bar High, Then Soar Above.

These forward-thinking companies are recognized by EPA as leaders in implementing and promoting voluntary, cost-effective measures to reduce emissions of methane, a potent greenhouse gas. By sharing their successes through the Natural Gas STAR Program, these and over 100 other oil and gas companies are addressing global climate change while improving profitability.

To learn more about joining these industry leaders, call the Natural Gas STAR Program at 202-343-9386 or 202-343-9086.

The Natural Gas STAR Program is a voluntary partnership between EPA and the oil and natural gas industry to identify and implement cost-effective projects to reduce methane emissions.
